**s3557912** 2017-03-01 10:20  
Hello

**chen0067** 2017-03-01 12:21  
Hey guys i think we should plan some fix time to do the scrum

**bryan250295** 2017-03-01 12:27  
Good point

**bryan250295** 2017-03-01 14:03  
Hi

**s3557912** 2017-03-05 03:49  
Is everyone going to lecture Monday? If yes, then we can have a scrum meeting then

**s3557912** 2017-03-05 04:02  
Is everyone going to lecture Monday? If yes, then we can have a scrum meeting then

**chen0067** 2017-03-05 09:09  
yeah, i am going

**s3557912** 2017-03-05 11:43  
@chen0067 I'll see you then

**s3557912** 2017-03-06 06:52  
let's have our scrum meeting

**s3557912** 2017-03-06 06:53  
I'm in the back where are you?

**chen0067** 2017-03-07 07:13

hey guys, maybe we should meet up tomorrow for the scrum meeting

**chen0067** 2017-03-07 07:13

I'm free after 4.30pm

**chen0067** 2017-03-07 07:14

So maybe we should held the meeting right before the SEPT tute

**s3557912** 2017-03-07 07:15

I'm free anytime after the Computing Theory lecture

**chen0067** 2017-03-07 07:15

alright :+1:

**chen0067** 2017-03-07 07:15

so lets wait for Kai's reply

**s3557912** 2017-03-07 07:15

Ok

**chen0067** 2017-03-07 07:15

see if he is free after 4.30pm

**chen0067** 2017-03-07 07:15

@kzmain

**bryan250295** 2017-03-07 14:27

okay:grinning:

**s3557912** 2017-03-08 01:37

So are we meeting? I'm in the Computing Theory lecture now

**chen0067** 2017-03-08 01:38

yup will meet up after 4.30pm

**s3557912** 2017-03-08 01:39

Where?

**kzmain** 2017-03-08 02:11

sorry for did not checked the message

**kzmain** 2017-03-08 02:12

what about after 4.30 in building 12 level 10 student bay?

**s3557912** 2017-03-08 02:13

Yes that's good

**kzmain** 2017-03-08 02:13

there will be enough space for our computer and also good environment for discussing

**s3557912** 2017-03-08 02:19

See you there

**chen0067** 2017-03-08 02:34

Alright

**chen0067** 2017-03-08 02:35

See you there

**chen0067** 2017-03-08 06:01

@chen0067 uploaded a file: [https://kbwa.slack.com/files/chen0067/F4F8H1NLC/summary\\_for\\_assignment.rtf](https://kbwa.slack.com/files/chen0067/F4F8H1NLC/summary_for_assignment.rtf) and commented: here guys, a summarised version that i have made for the assignment

**chen0067** 2017-03-08 09:02

<https://www.lucidchart.com/invitations/accept/cf212d8c-00fc-4b71-a6bc-17a0af398f09>

**chen0067** 2017-03-08 09:57

@chen0067 uploaded a file: [https://kbwa.slack.com/files/chen0067/F4FBXNJ13/screen\\_shot\\_2017-02-28\\_at\\_3.23.12\\_pm.png](https://kbwa.slack.com/files/chen0067/F4FBXNJ13/screen_shot_2017-02-28_at_3.23.12_pm.png)

**chen0067** 2017-03-08 09:58

@chen0067 uploaded a file: [https://kbwa.slack.com/files/chen0067/F4F7AQERZ/screen\\_shot\\_2017-02-28\\_at\\_3.23.49\\_pm.png](https://kbwa.slack.com/files/chen0067/F4F7AQERZ/screen_shot_2017-02-28_at_3.23.49_pm.png)

**chen0067** 2017-03-08 09:58

uploading trello examples here

**chen0067** 2017-03-08 09:58

@chen0067 uploaded a file: [https://kbwa.slack.com/files/chen0067/F4F9BBFV0/screen\\_shot\\_2017-02-28\\_at\\_3.24.21\\_pm.png](https://kbwa.slack.com/files/chen0067/F4F9BBFV0/screen_shot_2017-02-28_at_3.24.21_pm.png)

**chen0067** 2017-03-09 08:56

hey guys, we've done the class diagram for the assignment, please help us to check if we're on the right track

**chen0067** 2017-03-09 08:57

lucidChart link had been posted on Trello, do tell me if you guys cannot view the the diagram or access the link

**s3557912** 2017-03-09 12:26

I think it's good for now, with PHP it's not really strictly Object Oriented so we don't really need to worry too much about it being exact, just to give us an idea of the structure

**chen0067** 2017-03-09 12:41

Ahh alright~ thanks man

**s3557912** 2017-03-09 12:41

I've done some stuff related to the Login Page. I have committed code to my branch on Github and created a pull request. I'd like to merge it into the master branch so that we have something to start with. I've tried to create a MVC structure to make it easier to create new pages.

**s3557912** 2017-03-09 12:42

If everybody says something about what they have done since the last meeting, we can make this our next official Scrum meeting.

**chen0067** 2017-03-09 12:50

:ok\_hand::skin-tone-2:

**chen0067** 2017-03-11 04:39

done the mockups

**chen0067** 2017-03-11 04:40

But i've no printer, maybe we can have a short meet up?

**chen0067** 2017-03-11 04:41

Maybe i can meet with Arthur? Just to show him the drafts i made.

**chen0067** 2017-03-11 09:55

@chen0067 uploaded a file: [https://kbwa.slack.com/files/chen0067/F4H0E8KFU/doc\\_11\\_mar\\_2017\\_20\\_38.pdf](https://kbwa.slack.com/files/chen0067/F4H0E8KFU/doc_11_mar_2017_20_38.pdf)

**chen0067** 2017-03-11 09:56

Guys, this is the mockups

**chen0067** 2017-03-11 09:56

Sorry for the bad quality, i scanned it using phone apps

**chen0067** 2017-03-11 09:57  
Will show it to you guys when meeting

**s3557912** 2017-03-11 23:45  
Sure when do you want to meet?

**chen0067** 2017-03-12 03:55  
@s3557912 sorry for the late reply, how about 4pm?

**s3557912** 2017-03-12 07:08  
I can still meet anytime today, Monday anytime before 6pm, and anytime Tuesday

**chen0067** 2017-03-12 07:19  
Alright i walk to lonsdale st now

**chen0067** 2017-03-12 07:19  
Call you when i reach

**chen0067** 2017-03-12 07:33  
@s3557912 so we meet at melbourne central shopping center?

**s3557912** 2017-03-14 07:20  
So we should have a scrum meeting tomorrow

**chen0067** 2017-03-14 07:35  
Alright~ same as last week?

**chen0067** 2017-03-14 07:35  
4.30pm?

**chen0067** 2017-03-14 07:36  
Is that alright?

**s3557912** 2017-03-14 07:36  
Yeah that's good, same place?

**chen0067** 2017-03-14 07:36  
YUP

**s3557912** 2017-03-14 07:36  
OK

**chen0067** 2017-03-14 07:36  
@kzmain @bryan250295

**bryan250295** 2017-03-14 07:53  
Got it:ok\_hand::skin-tone-2:

**s3557912** 2017-03-15 04:59  
We're on Level 7 Building 10 now if you want to join us

**bryan250295** 2017-03-15 09:30  
@kzmain

**s3557912** 2017-03-15 14:57  
Hey guys, since Homy suggested we use Laravel, I've set up a simple Laravel installation on Heroku. You can access it at: <http://thawing-atoll-74127.herokuapp.com/>

**s3557912** 2017-03-15 15:11  
This is basically the default app, which has Login and Register built in, so we don't have to do anything.

**chen0067** 2017-03-15 15:13  
Okay, will take a look tmr when i wake up thanks! Good night Arthur :blush:

**s3557912** 2017-03-15 15:14  
No worries I didn't think anyone was still awake

**kzmain** 2017-03-16 03:21  
checked. I found that the interface changed a lot.

**s3557912** 2017-03-16 04:05  
This is the built in login functionality provided by Laravel. If you want to change the visual design you are welcome to, but the interface is not so different.

**kzmain** 2017-03-16 22:12  
The interface is quiet enough, however I am not sure can we use that because this means not all the codes wrote by ourselves.Weather will be considered as plagiarize?

**s3557912** 2017-03-17 01:13  
It was Homy's suggestion to use Laravel, I don't see how it would be a problem. He seems more concerned about writing tests. If we want to write a lot of tests, pretty much we have to use Laravel, otherwise we have to do a lot more work ourselves writing our own testing infrastructure.

**chen0067** 2017-03-17 06:36

@kzmain @s3557912 if we are not so sure about it maybe we can ask homy through email to make sure that we are doing the right thing

**s3557912** 2017-03-17 07:24

If you want to ask him you can, but we really need to get started on writing some tests, I feel that we are wasting too much time, we need to start getting things done. When we met on Wednesday, Homy said that he wants to see lots of tests, he doesn't really care about our code as much. We should be finished with Login and Register plus starting on the next feature by Week 4 according to the assignment. I don't see how it is plagiarism because we are acknowledging that we are using the code provided that is part of Laravel. Similarly, we are using the code from Bootstrap. That also is not our code, but we are using it. If we acknowledge it, then it is not plagiarism.

**chen0067** 2017-03-17 07:58

Alrightttt~ shall we meet up tmr?

**s3557912** 2017-03-17 09:09

What time?

**chen0067** 2017-03-17 09:17

Anytime, we can come out when u free

**s3557912** 2017-03-17 09:18

Ok what about Kai?

**chen0067** 2017-03-17 09:18

I think he is working on the weekend

**chen0067** 2017-03-17 09:18

So he might not be free

**chen0067** 2017-03-17 09:18

@kzmain

**s3557912** 2017-03-17 09:19

Then maybe 3:00p or so

**s3557912** 2017-03-17 09:19

?

**chen0067** 2017-03-17 09:21  
okay. Melbourne Central foodcourt?

**s3557912** 2017-03-17 09:22  
ok

**chen0067** 2017-03-17 09:22  
see you tomorrow then :+1:

**s3557912** 2017-03-17 09:22  
bring your computer

**chen0067** 2017-03-17 09:22  
sure

**kzmain** 2017-03-18 02:00  
Today? I am free today.

**kzmain** 2017-03-18 02:01  
I will see you there.

**s3557912** 2017-03-18 02:01  
Ok see you then

**chen0067** 2017-03-18 03:19  
@s3557912 might be late for 10-15mins cuz im still at north mel

**chen0067** 2017-03-18 03:20  
Getting my stuff there

**s3557912** 2017-03-18 04:00  
ok

**kzmain** 2017-03-18 04:01  
I am at flinders street station. I will get Melbourne Central in 5-10 min

**s3557912** 2017-03-18 04:01  
no worries

**kzmain** 2017-03-18 04:02  
May I ask where is the food court? Near the entrance of Metro?

**s3557912** 2017-03-18 04:03  
How about if we meet at Building 10 instead?

**s3557912** 2017-03-18 04:03

It's kind of crowded here

**kzmain** 2017-03-18 04:04

Fine

**s3557912** 2017-03-18 04:05

Actually they're here on the 3rd floor Melbourne Central food court, so we can just wait here for you

**s3557912** 2017-03-19 09:23

I added a bunch of tests for Login and Register to the git repository. We can never have too many tests though...

**kzmain** 2017-03-19 10:08

Register part done. Please check github.

**s3557912** 2017-03-19 12:04

I believe that there are a few issues. First, you are using backslashes (\) in the file names, this is not cross-platform and will break if you run on a platform other than Windows, which is the majority of web environments. I had to change the same file name `?.\account.db?` in multiple places just to get it to run. The validation is overly strict. I can enter a valid email address and it will be rejected by the validation. Similarly, passwords are limited to a small number of characters. If I enter `*****` as my password, it will tell me that my password needs to be at least 6 characters, which is confusing (because the validation does not allow characters like `*` in the password, and there are no error messages that tell you so). It also does not support Unicode which would be nice but not a requirement. It does not give me meaningful error messages, like when I register a user who is already in the database, there is no error message at all. The code itself does not follow the MVC structure of Model-View-Controller. The `UserClass.php` object is in the `?mvc/view?` directory, but it is a model, not a view. The code at the beginning of `?page-register.php?` that writes the data to the file should be in the controller portion of the code. Because the model-view-controller code is inter-mixed, I think it makes it very difficult to write tests for the code, since the code is interdependent, and not cleanly separated. Also, the lack of meaningful error messages makes it difficult to write tests.

**chen0067** 2017-03-19 12:27

@kzmain hi kai, we are planning to look for Lawrence tomorrow at 3pm

**chen0067** 2017-03-19 12:28

Just wanted to know if you are free at that time for the consultation as we are currently having conflict with our team decision making and our GitHub is kind of messed up

**chen0067** 2017-03-19 12:30

Do reply us before 3pm so that we can solve the problem out as soon as possible

**kzmain** 2017-03-19 13:08

1. First, you are using backslashes (\) in the file names, this is not cross-platform and will break if you run on a platform other than Windows, which is the majority of web environments. I had to change the same file name ?.\account.db? in multiple places just to get it to run. :white\_check\_mark:Solved

**kzmain** 2017-03-19 13:09

1. The validation is overly strict. I can enter a valid email address and it will be rejected by the validation. :x:Can't fix cause it passed on my server. Please give me an example.

**kzmain** 2017-03-19 13:09

1. Similarly, passwords are limited to a small number of characters. If I enter \*\*\*\*\* as my password, it will tell me that my password needs to be at least 6 characters, which is confusing (because the validation does not allow characters like \* in the password, and there are no error messages that tell you so). :white\_check\_mark:Solved

**kzmain** 2017-03-19 13:12

1. It also does not support Unicode which would be nice but not a requirement. :question:Confused. You mean .db file or php file?

**s3557912** 2017-03-19 13:12

This is the regular expression you are using to validate email addresses: `preg_match('/[a-zA-Z._]@[a-zA-Z._]\/',$_POST['mail'])` However it is legal to have characters such as `!#$%&?*+/-=?^`{|}~;` Please refer to [https://en.wikipedia.org/wiki/Email\\_address#Syntax](https://en.wikipedia.org/wiki/Email_address#Syntax) for a better description of legal email addresses

**s3557912** 2017-03-19 13:15

You are using the regular expression: `preg_match('/[a-zA-Z]+/', $_POST['firstName'])` to validate a name, which means that you are only allowed to use alphabetic characters, so if you want to use a name with characters like ? it is not possible, this would be nice but not necessarily a requirement

**s3557912** 2017-03-19 13:17

Also, passwords shouldn't be stored in plain text

**kzmain** 2017-03-19 13:20

It does not give me meaningful error messages, like when I register a user who is already in the database, there is no error message at all.(This continuing I am still think about it, just give you first edition to do the test.Or it will be too late to do on Tuesday or Wednesday)

**kzmain** 2017-03-19 13:27

2. The code itself does not follow the MVC structure of Model-View-Controller. The `UserClass.php` object is in the `?mvc/view?` directory, but it is a model, not a view. The code at the beginning of `?page-register.php?` that writes the data to the file should be in the controller portion of the code. Because the model-view-controller code is inter-mixed, I think it makes it very difficult to write tests for the code, since the code is interdependent, and not cleanly separated. Also, the lack of meaningful error messages makes it difficult to write tests.:question:This one I am not sure.I did not study an mvc system related, which also makes me confused. Still makes me confused. You can tell me lively, like 'what'(function) puts 'where'(\*.php file)

**kzmain** 2017-03-19 13:30

About mail: The reason why I did not put the limitation is that a lot of company put the limitation like gmail.

**s3557912** 2017-03-19 13:31

your model is the data, the view is the HTML, the controller is the logic. The model is where you maintain state (i.e. the database). The view simply generates the HTML without side effects.

**kzmain** 2017-03-19 13:31

:heavy\_minus\_sign:About mail: The reason why I did not put the limitation is that a lot of company put the limitation like gmail. It only accept letters, numbers and periods. So if you stick on to put so much case I will change.

**kzmain** 2017-03-19 13:32

so as a function I don't think there's any problem about the mail problem.

**s3557912** 2017-03-19 13:33

Also none of the code seems to be reusable.

**kzmain** 2017-03-19 13:36

About Unicode problem. As the user is oriented to English-related user. I won't change it in this sprint. Cause I think it is low priority. Just put it into Product Backlog.

**kzmain** 2017-03-19 13:38

Excuse me? I write my code. Please stop grumble, just tell the problem. Where to change and how to change.

**s3557912** 2017-03-19 13:39

??? What I am saying is that there is no abstraction of the functions so that it is easier to write the next task

**kzmain** 2017-03-19 13:40

Which function need to change. In what way.

**kzmain** 2017-03-19 13:40

Especially which function you think need to change or restructure.

**s3557912** 2017-03-19 13:40

For each class you will basically be writing some data to the database, in this case it is a file.

**s3557912** 2017-03-19 13:41

But you are simply opening a file and using fwrite for each field.

**s3557912** 2017-03-19 13:42

But it would be easier to have a more generic function to write data to a file

**kzmain** 2017-03-19 13:42

I did not write database which aim at whenever and wherever to demo will be the same effect.

**s3557912** 2017-03-19 13:42

In this case I am referring to the flat file as a database

**s3557912** 2017-03-19 13:43

But it makes it more difficult to write the next task

**s3557912** 2017-03-19 13:43

And with each task it becomes more and more difficult if it is not abstracted

**kzmain** 2017-03-20 12:33

@s3557912 Aurthor. I do not know why the 'vendor' folder did not sync on github which lead chen's Laravel failed to work. I have already send a copy of that folder to him, which work on my computer. Furthermore, when I entered 127.0.0.1:8000 it seems our page is not there could you commit the function we need to show to master branch?

**kzmain** 2017-03-20 12:34

@kzmain uploaded a file: [https://kbwa.slack.com/files/kzmain/F4MCN1NDC/pasted\\_image\\_at\\_2017\\_03\\_20\\_11\\_33\\_pm.png](https://kbwa.slack.com/files/kzmain/F4MCN1NDC/pasted_image_at_2017_03_20_11_33_pm.png)

**kzmain** 2017-03-20 12:37

Missing 'vendor' folder also happened to me today, which even made me cannot start server. I copied that folder from a test project which I set up today then it works. However it seems some page missed.

**chen0067** 2017-03-20 12:38

Not dare to merge it haha

**chen0067** 2017-03-20 12:39

I scare this shit will happen to me again xD

**chen0067** 2017-03-22 03:49

@s3557912 4.30pm student bay later?

**s3557912** 2017-03-22 04:58

Ok see you there

**s3557912** 2017-03-22 05:01

Sorry I didn't see these messages before, I'm connecting via XMPP through iMessage and it didn't send the message

**s3557912** 2017-03-22 05:02

The 'vendor' folder is not sync'ed with the Git repository. There is a '.gitignore' file which tells git to ignore the vendor directory. The vendor directory gets downloaded when you do a 'composer install'

**chen0067** 2017-03-22 09:45

@chen0067 uploaded a file: [https://kbwa.slack.com/files/chen0067/F4MT8N8M8/17342140\\_10212366599106164\\_1327060508\\_o.jpg](https://kbwa.slack.com/files/chen0067/F4MT8N8M8/17342140_10212366599106164_1327060508_o.jpg)

**s3557912** 2017-03-22 12:37

Cleaned up git repository. If you start working on a new task, start with the master, then create a branch with the name of the task. Once it is done, do a pull request, merge it with the master, then delete the branch

**chen0067** 2017-03-24 09:23

meeting tomorrow?

**kzmain** 2017-03-24 09:23

I have work tomorrow. Sorry.

**chen0067** 2017-03-24 09:24

Anyone knows that we have to do a scrum meeting in front of Homy next Wednesday?

**kzmain** 2017-03-24 09:24

Yep

**chen0067** 2017-03-24 09:24

ahh is okay, then maybe those who free can meet tomorrow first, then we meet you right before wed

**s3557912** 2017-03-24 09:54

What time you want to meet?

**chen0067** 2017-03-24 09:54

what time do you prefer?

**chen0067** 2017-03-24 09:54

i prefer afternoon actually

**s3557912** 2017-03-24 09:54

4pm?

**chen0067** 2017-03-24 09:54  
ahh

**chen0067** 2017-03-24 09:54  
okok

**chen0067** 2017-03-24 09:54  
same place?

**s3557912** 2017-03-24 09:55  
rmit student bay?

**chen0067** 2017-03-24 09:55  
okay

**s3557912** 2017-03-24 09:55  
ok see you tomorrow then

**chen0067** 2017-03-24 09:55  
:ok\_hand:

**chen0067** 2017-03-26 03:54  
hi, can we have a meeting on monday noon? Because Kai is working on Tuesday all day

**chen0067** 2017-03-26 03:55  
12.30pm - 1.30pm

**chen0067** 2017-03-26 03:55  
Else we might have to meet after the SEPT lecture on monday i guess

**s3557912** 2017-03-26 06:34  
1230pm is ok

**bryan250295** 2017-03-26 09:56  
Yeah that's good, meet you there tomorrow

**chen0067** 2017-03-26 09:57  
alright~meet there by 12.30pm at student bay :smile:

**s3557912** 2017-03-26 09:57  
Ok see you there

**kzmain** 2017-03-27 01:35  
Hi, is there any one at student bay?

**s3557912** 2017-03-27 01:36

yes where are you

**kzmain** 2017-03-27 01:36

Student bay....

**s3557912** 2017-03-27 01:36

level 10?

**kzmain** 2017-03-27 01:36

Yep

**s3557912** 2017-03-27 11:40

The mockups still need to be uploaded.

**s3557912** 2017-03-27 11:40

Also, write some more tests in the directory 'testing/Unit'

**chen0067** 2017-03-27 11:40

Oh yaaa

**chen0067** 2017-03-27 11:40

Sorry, too focus on C

**chen0067** 2017-03-27 11:40

Okau

**s3557912** 2017-03-27 11:41

And do actual testing at <http://thawing-atoll-74127.herokuapp.com/>

**s3557912** 2017-03-27 11:41

@chen0067 no problem, just need to have this for our meeting with Homy on Wednesday

**chen0067** 2017-03-27 11:46

okay

**chen0067** 2017-03-27 11:57

done uploading mockups

**chen0067** 2017-03-27 11:57

sorry for the delay

**s3557912** 2017-03-27 11:57  
no problem thanks

**chen0067** 2017-03-27 11:57  
:ok\_hand:

**chen0067** 2017-03-30 04:41  
@kzmain hi kai, just to remind you that you should upload a meeting minutes for yesterday :smile:

**chen0067** 2017-03-30 05:08  
is okay guys, i did the meeting minutes for yesterday and today together and uploaded it to Trello

**chen0067** 2017-03-30 05:08  
peace

**chen0067** 2017-03-30 05:09  
so our next meeting will be on Sunday ya~ after 6pm as Arthur is not free before that :slightly\_smiling\_face:

**s3557912** 2017-03-30 05:18  
If you want, you can meet without me on Sunday

**s3557912** 2017-03-30 05:18  
If after 6pm is not good

**chen0067** 2017-03-30 05:18  
Alright, lets see what kai says

**kzmain** 2017-04-01 23:40  
See you 6pm

**s3557912** 2017-04-02 01:17  
Ok

**chen0067** 2017-04-02 05:58  
Where to meet?

**s3557912** 2017-04-02 05:58  
Your choice, campus is closed I think

**chen0067** 2017-04-02 05:59  
Melbourne central food court?

**s3557912** 2017-04-02 05:59

Ok

**chen0067** 2017-04-02 06:00

haha i a bit confused about the thing you explained last week, haha sorry. We'll talk later :smile:

**s3557912** 2017-04-02 06:01

Ok

**kzmain** 2017-04-03 07:17

Hi,guys. I have already done the front end part, which is included in the resources\views\bookingPannel . 1. I wrote bookingFilterPannel.blade.php, however BookingChoosePannel.blade.php is copied from Arthor's code which codes are quite good. 2. bookingFilterPannel.blade.php includes a form but I did not add the action attribute for I don't know which Controller to use. 3.BookingChoosePannel.blade.php I haven't test it yet for I think I have some database structure problem from my computer some functions do not work well.

**kzmain** 2017-04-03 07:18

4. Both blades are called from customer's /home page, for I think there's no other function for customer. I think you can change the route from the controller if you want.

**kzmain** 2017-04-03 07:20

submitted to GitHub already.

**s3557912** 2017-04-03 07:57

I can't find it on Github. Are you sure it's there?

**kzmain** 2017-04-03 08:27

Sorry for did not sync, please recheck

**kzmain** 2017-04-03 08:27

Now it is in github. I double checked.

**s3557912** 2017-04-03 11:10

I've pushed it to Heroku, but you'll have to add a route to routes/web.php, I can't do it because I don't know what the form is supposed to return when you submit

**kzmain** 2017-04-03 11:26

It returns available bookings for customer. The reason why I did not add the route is that I just display the choosing form and result in /home page not in other pages. However I am not sure which validator , service provider and how it perform to retrieve available bookings in back-end. I am still a bit confused about structure. At the same time I still have database problem so I cannot test it when I am writing code. (On my computer I cannot add service and abilities). This is the reason why i did not do the submit url and a submit test. Further more

**s3557912** 2017-04-03 13:42

Try: php artisan migrate:rollback

**s3557912** 2017-04-03 13:42

php artisan migrate

**s3557912** 2017-04-03 13:42

then php artisan db:seed

**s3557912** 2017-04-03 13:46

Look at app/Http/Controllers/DebugController.php, the function viewAvailable() to see how to retrieve available bookings

**s3557912** 2017-04-03 13:47

There is no validator right now, and you shouldn't need a service provider

**s3557912** 2017-04-04 13:12

Hey, everybody should read the Part A Submission instructions, we have to submit by April 10. Also everyone have a look at the Part B instructions, it actually seems like we've already implemented most of the functionality, there are not many requirements

**kzmain** 2017-04-04 14:34

I just back home for some reasons, sorry.

**kzmain** 2017-04-05 06:24

Thanks for helping, I get my part done.

**kzmain** 2017-04-05 06:26

Submitted!

**chen0067** 2017-04-07 08:46

hmm guys

**chen0067** 2017-04-07 08:47

can i like do that HOW TO(Business owner part) on tomorrow

**chen0067** 2017-04-07 08:47

because i think i need to get started with my C

**s3557912** 2017-04-08 05:01

Ok I made a submission for the assignment, the ZIP file is on Trello in the Product Backlog. Everybody should check it to make sure it is OK

**chen0067** 2017-04-08 05:04

hmm the HOWTO for business owner part is not done yet

**chen0067** 2017-04-08 05:05

i will get it done by tonight and resubmit

**s3557912** 2017-04-08 05:25

I think Kai did it, I took the one from Google Drive

**chen0067** 2017-04-08 05:25  
he did the customer part

**chen0067** 2017-04-08 05:26  
but i was told to do the business part

**chen0067** 2017-04-08 05:26  
so

**chen0067** 2017-04-08 05:26  
when you read on the business owner part, it is not really done yet

**s3557912** 2017-04-08 05:26  
There are some instructions for the business owner in the PDF

**chen0067** 2017-04-08 05:26  
yup

**chen0067** 2017-04-08 05:27  
half way

**s3557912** 2017-04-08 05:27  
I think it's enough though

**chen0067** 2017-04-08 05:27  
hmm :thinking\_face:

**s3557912** 2017-04-08 05:27  
This assignment isn't worth that many marks

**chen0067** 2017-04-08 05:28  
:ok\_hand:

**s3557912** 2017-04-25 12:17  
So just a reminder, we have a demo tomorrow, and we have to submit Part B by Monday. I think all the functionality is done, all we need to do is documentation and maybe testing

**chen0067** 2017-04-25 12:32  
:ok\_hand::skin-tone-2::ok\_hand::skin-tone-2:

**chen0067** 2017-04-26 09:14  
You guys in the class yet?

**s3557912** 2017-04-26 09:15

No are you?

**chen0067** 2017-04-26 09:15

Otw
