

# COSC1112/1114: Operating Systems Principles

## Lab 1 (week 2)

For this course, you will require a reasonable understanding of the UNIX environment and the C programming language. In this first lab, do the following as appropriate:

- Login and create a directory for your OSP work via the *coreteaching* servers. Ask your lab assistant how to do this, if you are uncertain.
  - ✓ titan.csit.rmit.edu.au
  - ✓ saturn.csit.rmit.edu.au
  - ✓ jupiter.csit.rmit.edu.au
- Please follow the provided Unix Survival Guide PDF and familiarise yourselves with the topics discussed. In particular, following the example in UnixSurvivalGuide PDF (page 29),
  - ✓ Writing and Compiling your first C Program
